Memorandum

Date September 24, 1991

From Robert E. Safay
ATSDR Regional Representative

Subject Review of Revised Sampling and Analysis Plan for the Macroinvertebrate
Study and Fish Sampling - Olin Corporation/McIntosh Plant.

To Cheryl W. Smith, RPM
South Superfund Remedial Branch

As requested I have reviewed the sampling plan for the Olin Corporation/McIntosh Plant. The plan appears to be complete with no major deficiencies apparent. My only comment is that I am a little confused as to the comparison area and how the macroinvertebrate data will be interpreted. Will they be using a diversity index.

If I can be of further assistance, please let me know.

Robert E. Safay
